The Tourism Economy Study: CCU Lodging Update, April 27, 2017

Current Performance Estimates

Hotel, Condo-Hotel and Campsite Properties

Preliminary results from Coastal Carolina University's voluntary sample of hotel, condo-hotel and campsite (HC-HC) properties along the Grand Strand during the week of April 16-22, 2017, indicates that the midweek occupancy rate averaged 65.1 percent, up 21.1 occupancy points or 47.9 percent compared to the equivalent week of 2016. During the Friday-Saturday night period, the occupancy rate averaged 89.9 percent, up 2.7 occupancy points or 3.1 percent compared to the equivalent weekend last year. The average daily rate (ADR) was up 27.8 percent during the midweek period and up 13.5 percent during the weekend compared with last year. Consequently, HC-HC occupancy for the week overall was up 15.8 occupancy points or 28 percent, and revenue per available room (RevPAR) was up 52.3 percent compared with the equivalent week of 2016.

VRPs

Based on the Brittain Center's observations of random samples of internet websites of vacation rental properties (VRPs) in the coastal sections of Horry and Georgetown counties (318 of the 3,135 units) for which complete data are publicly available, 62.1 percent were reserved or blocked from nightly rentals during the nights of April 15-21, 2017. The level of reservations was up 8.8 occupancy points or 16.5 percent compared with the equivalent week of 2016. For the nights of April 22-28, 2017, 48.5 percent of the VRPs were reserved or blocked from reservation. The level of reservations was down 7.7 occupancy points or 13.8 percent compared with the equivalent week of 2016.

Six-Week Average Performance

Preliminary results indicate that during the nights of March 12-April 22, 2017, 64.6 percent of the lodging properties in the Brittain Center's voluntary sample of HC-HC properties located along the Grand Strand were occupied, which was up 3.2 occupancy points or 5.3 percent compared with the equivalent weeks of 2016. The average daily rate for these properties was up 10.9 percent compared with the equivalent weeks of 2016, driving average RevPAR up 16.7 percent compared with the equivalent period of 2016. During the same period in 2017, 59.5 percent of the VRP bedrooms in the Center's random sample of Horry County VRPs were reserved or blocked from nightly rentals, down 0.5 occupancy point or 0.9 percent compared with the equivalent weeks of 2016. Advertised prices for this segment were up 0.3 percent compared with the equivalent weeks of 2016, which would drive revenue per available bedroom down 0.6 percent compared with the equivalent weeks of 2016.

Forecast and Analysis

According to weather.com at the time of this writing, the forecast for the weekend of April 29-30, 2017, calls for a high temperature of 82 degrees and 80 degrees, and a 10 percent and 20 percent chance of precipitation, respectively. The Brittain Center predicts that average occupancy for its sample of HC-HC properties may be near or above 85 percent for the nights of April 28-29, 2017. Based on this week's observations by Center researchers of 318 websites of VRPs available to rent in Horry and Georgetown counties, 50 percent are reserved for the week of April 29-May 5, 2017. VRP reservations in Horry and Georgetown counties for that week are up 11 occupancy points or 28.4 percent compared with the same week of 2016.

Additional Research Notes

The Brittain Center's preliminary sample of 28 HC-HC properties reporting for the week of April 16-22, 2017, consisted of 14 hotels (all but five are oceanfront/view, and five are brand affiliated), 13 condo-hotels (all are oceanfront/view), and one campground resort property. The results for the current moving six-week period are based on an average sample size of 9,140 units per week average.
